### We Mostly Surf Asu and Bawa, Here Is An Overview Of All Spots

**Asu** - left hand wave that works on all tides, big and small swells, and south wind conditions. From 2-6 feet, it is a perfect and fun wave peeling over coral reef with barrels and variety of conditions.

Asu can handle up to 10 foot waves and still maintain good shape.

**Bawa – Never goes flat.** Righthander, lots of variety. Surfable from 2-8 feet. Over 10 feet it is time to break out the jet-ski.

**Hamutala Left** - Is a perfect symmetrical high performance wave. In glassy or off-shore conditions 4 – 6 second barrels are possible from the take off. **Needs a big swell to work** and stays fun sized when other spots are too big.

From 2 – 6 feet and technically doesn't get any bigger than this; it does become more hollow and round.

www.puriasuresort.com

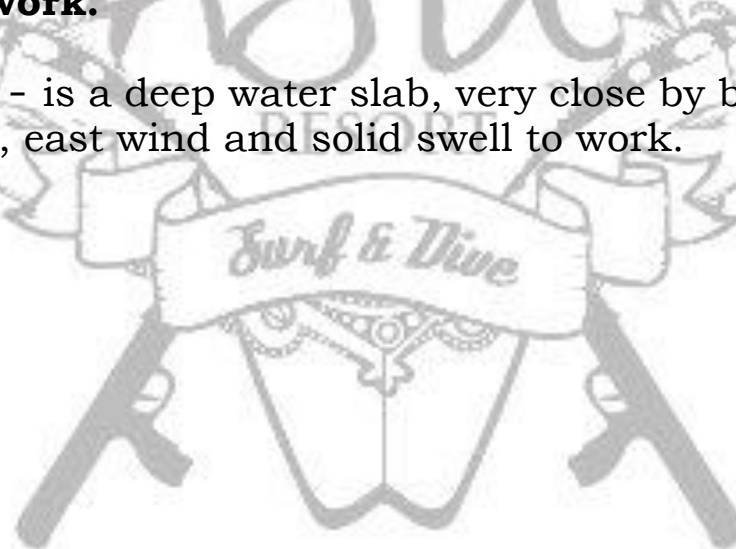

**Hamutala Right** – Often called Mini Bawa It's a **friendly wave up to 6 feet**, then it shows it's power. Deep water and thick lips when it is over 6 feet.

**Sirombu** - is a sheltered rippable right-hander located near the Sirombu harbour. Its the **best for intermediate surfers and works when things are a bit messy**. Some barrels, sand and reef bottom.

**Afulu** - is located 40-50 minutes from Asu. A dream left-hander on the Nias mainland and offers incredible tube rides with rippable walls. **Needs large swell** to work.

**Salonako** -45 minutes from Asu. "Super Perfect" right-hander and can provide challenging barrel rides. Super fast, with sand and reef bottom. It **needs larger ground swell to work**.

**Bommie** - is a deep water slab, very close by but needs a low tide, east wind and solid swell to work.
